

Employees' Retirement System of the State of Hawaii

Table of Employee Benefit Limitations

The following are limits impacting benefits paid by the ERS:

1. Annual Limitation on Compensation (IRC § 401(a)(17))
 - Note: This is the maximum amount of compensation that may be used in the Average Final Compensation calculation by the ERS to determine pension benefits.
 - No contribution should be received by the ERS for salaries above these annual amounts. This applies to member contributions to the Annuity Savings Fund (AS).

2. Limitation on Benefits under a Defined Benefit Plan (IRC § 415)
 - Note: This is an annual limit for actual benefit payments (i.e. pension payments) that may be paid to retirees.
 - The limit is adjusted for certain individuals that retire prior to age 62.
 - An individualized calculation is required to determine the actual amount for these retirants.
 - Sometimes referred to as the 415 benefit limits.
